Repatriation Medical Authority

EXPLANATORY STATEMENT

**STATEMENT OF PRINCIPLES CONCERNING
ROTATOR CUFF SYNDROME
(BALANCE OF PROBABILITIES) (NO. 110 OF 2022)**

VETERANS' ENTITLEMENTS ACT 1986
MILITARY REHABILITATION AND COMPENSATION ACT 2004

1. This is the Explanatory Statement to the *Statement of Principles concerning rotator cuff syndrome (Balance of Probabilities)* (No. 110 of 2022).

Background

2. The Repatriation Medical Authority (the Authority), under subsection 196B(8) of the *Veterans' Entitlements Act 1986* (the VEA), repeals Instrument No. 101 of 2014 (Federal Register of Legislation No. F2014L01379) determined under subsections 196B(3) and (8) of the VEA concerning **rotator cuff syndrome**.
3. The Authority is of the view that on the sound medical-scientific evidence available it is more probable than not that **rotator cuff syndrome** and **death from rotator cuff syndrome** can be related to particular kinds of service. The Authority has therefore determined pursuant to subsection 196B(3) of the VEA a Statement of Principles concerning **rotator cuff syndrome** (Balance of Probabilities) (No. 110 of 2022). This Instrument will in effect replace the repealed Statement of Principles.

Purpose and Operation

4. The Statement of Principles will be applied in determining claims under the VEA and the *Military Rehabilitation and Compensation Act 2004* (the MRCA).
5. The Statement of Principles sets out the factors that must exist, and which of those factors must be related to the following kinds of service rendered by a person:
 - eligible war service (other than operational service) under the VEA;
 - defence service (other than hazardous service and British nuclear test defence service) under the VEA;
 - peacetime service under the MRCA,

before it can be said that, on the balance of probabilities, rotator cuff syndrome or death from rotator cuff syndrome is connected with the circumstances of that service. The Statement of Principles has been determined for the purposes of both the VEA and the MRCA.

6. This Instrument results from an investigation notified by the Authority in the Government Notices Gazette of 10 May 2022 concerning rotator cuff syndrome in accordance with section 196G of the VEA. The investigation involved an examination of the sound medical-scientific evidence now available to the Authority, including the sound medical-scientific evidence it has previously considered.

7. The contents of this Instrument are in similar terms as the repealed Instrument. Comparing this Instrument and the repealed Instrument, the differences include:
- adopting the latest revised Instrument format, which commenced in 2015;
 - specifying a day of commencement for the Instrument in section 2;
 - revising the definition of 'rotator cuff syndrome' in subsection 7(2);
 - revising the reference to 'ICD-10-AM code' in subsection 7(4);
 - revising the factors in subsections 9(1) and 9(17) concerning having an injury to the affected shoulder;
 - new factors in subsections 9(2) and 9(18) concerning undergoing a surgical procedure;
 - revising the factors in subsections 9(3) and 9(19) concerning performing repetitive or sustained, or forceful activities, by the inclusion of a note;
 - revising the factors in subsections 9(4) and 9(20) concerning performing repetitive or sustained activities;
 - new factors in subsections 9(5) and 9(21) concerning lifting or carrying loads;
 - revising the factors in subsections 9(6) and 9(22) concerning having dialysis-related amyloidosis, by the inclusion of a note;
 - revising the factors in subsections 9(8) and 9(24) concerning having anatomical narrowing of the subacromial space, by the inclusion of a note;
 - revising the factors in subsections 9(9) and 9(25) concerning having joint instability;
 - revising the factors in subsections 9(10) and 9(26) concerning having an infection of the subacromial bursa or subdeltoid bursa;
 - revising the factors in subsections 9(11) and 9(27) concerning having an autoimmune disease;
 - new factors in subsections 9(13) and 9(29) concerning having diabetes mellitus;
 - new factors in subsections 9(14) and 9(30) concerning dyslipidaemia;
 - new factors in subsections 9(15) and 9(31) concerning taking a glucocorticoid;
 - new factors in subsections 9(16) and 9(32) concerning taking a fluoroquinolone antibiotic;
 - new definitions of 'dyslipidaemia', 'MRCA', 'specified list of autoimmune diseases', 'taking a glucocorticoid drug as specified' and 'VEA' in Schedule 1 - Dictionary;
 - revising the definitions of 'anatomical narrowing of the subacromial space', 'forceful activities' and 'relevant service' in Schedule 1 - Dictionary; and
 - deleting the definition of 'excess laxity of the shoulder joint'.

Consultation

8. Prior to determining this Instrument, the Authority advertised its intention to undertake an investigation in relation to rotator cuff syndrome in the Government Notices Gazette of 10 May 2022, and circulated a copy of the notice of intention to investigate to a wide range of organisations representing veterans, service personnel and their dependants. The Authority invited submissions from the Repatriation Commission, the Military Rehabilitation and Compensation Commission, organisations and persons referred to in section 196E of the VEA, and any person having expertise in the field. No submissions were received for consideration by the Authority in relation to the investigation.

Human Rights

9. This instrument is compatible with the Human Rights and Freedoms recognised or declared in the International Instruments listed in Section 3 of the *Human Rights (Parliamentary Scrutiny) Act 2011*. A Statement of Compatibility with Human Rights follows.

Finalisation of Investigation

10. The determining of this Instrument finalises the investigation in relation to rotator cuff syndrome as advertised in the Government Notices Gazette of 10 May 2022.

Statement of Compatibility with Human Rights

(Prepared in accordance with Part 3 of the Human Rights (Parliamentary Scrutiny) Act 2011)

Instrument No.: **Statement of Principles No. 110 of 2022**

Kind of Injury, Disease or Death: **Rotator cuff syndrome**

This Legislative Instrument is compatible with the human rights and freedoms recognised or declared in the international instruments listed in section 3 of the *Human Rights (Parliamentary Scrutiny) Act 2011*.

Overview of the Legislative Instrument

1. This Legislative Instrument is determined pursuant to subsection 196B(3) of the *Veterans' Entitlements Act 1986* (the VEA) for the purposes of the VEA and the *Military Rehabilitation and Compensation Act 2004* (the MRCA). Part XIA of the VEA requires the determination of these instruments outlining the factors connecting particular kinds of injury, disease or death with service such being determined solely on the available sound medical-scientific evidence.
2. This Legislative Instrument:-
 - facilitates claimants in making, and the Repatriation Commission and the Military Rehabilitation and Compensation Commission in assessing, claims under the VEA and the MRCA respectively, by specifying the circumstances in which medical treatment and compensation can be extended to eligible persons who have rotator cuff syndrome;
 - facilitates the review of such decisions by the Veterans' Review Board and the Administrative Appeals Tribunal;
 - outlines the factors which the current sound medical-scientific evidence indicates must exist before it can be said that, on the balance of probabilities, rotator cuff syndrome is connected with the circumstances of eligible service rendered by a person, as set out in clause 5 of the Explanatory Statement;
 - replaces Instrument No. 101 of 2014; and
 - reflects developments in the available sound medical-scientific evidence concerning rotator cuff syndrome which have occurred since that earlier instrument was determined.
3. The Instrument is assessed as being a technical instrument which improves the medico-scientific quality of outcomes under the VEA and the MRCA.

Human Rights Implications

4. This Legislative Instrument does not derogate from any human rights. It promotes the human rights of veterans, current and former Defence Force members as well as other persons such as their dependents, including:
- the right to social security (Art 9, *International Covenant on Economic, Social and Cultural Rights*; Art 26, *Convention on the Rights of the Child* and Art 28, *Convention on the Rights of Persons with Disabilities*) by helping to ensure that the qualifying conditions for the benefit are 'reasonable, proportionate and transparent'¹;
 - the right to an adequate standard of living (Art 11, ICESCR; Art 27, CRC and Art 28, CRPD) by facilitating the assessment and determination of social security benefits;
 - the right to the enjoyment of the highest attainable standard of physical and mental health (Art 12, ICESCR and Art 25, CRPD), by facilitating the assessment and determination of compensation and benefits in relation to the treatment and rehabilitation of veterans and Defence Force members;
 - the rights of persons with disabilities by facilitating the determination of claims relating to treatment and rehabilitation (Art 26, CRPD); and
 - ensuring that those rights "will be exercised without discrimination of any kind as to race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status" (Art 2, ICESCR).

Conclusion

This Legislative Instrument is compatible with human rights as it does not derogate from and promotes a number of human rights.

Repatriation Medical Authority

¹ In General Comment No. 19 (The right to social security), the Committee on Economic, Social and Cultural Rights said (at paragraph 24) this to be one of the elements of ensuring accessibility to social security.
